

Trace

martes, 3 de abril de 2018 14:12

- Import model & scenario
- Construct solver manager
- Construct solver
- Wait for n servers to initialize
- Instance each scenario.
- Post-instance-creation PHSolverServer plugins
- Post-initialization PHSolverServer plugins
- Post-initialization ph plugins

Start PH

- **Iteration 0**
 - o Sync fixed variable status
 - o Queue solve for each scenario
 - o Wait for sceneario sub-problem solves
 - o Pre-iteration-0-solve PHSolverServer plugins
 - o Solve scenarios
 - o Load alll solutions
 - o Post-iteration-0-solve PHSolverServer plugins
 - o Converge
 - o Transmitting request to activate PH objective proximal terms to PH solver servers
 - o Transmitting request to activate PH objective weight terms to PH solver servers
- **Iteration k**
 - o Sync fixed variable status
 - o Transmit xbars
 - o Transmit weights
 - o Transmit rhos
 - o Queue solve for each scenario
 - o Wait for sceneario sub-problem solves
 - o Pre-iteration-k-solve PHSolverServer plugins
 - o Solve scenarios
 - o Load alll solutions
 - o Post-iteration-k-solve PHSolverServer plugins
